English: <https://www.dragon1.com/downloads/dragon1-entrepreneurship.pdf>

Dutch: <https://www.dragon1.com/downloads/dragon1-ondernemerschap.pdf>

Introduction

This document is useful for any entrepreneur, but it is created especially for unexperienced and starting entrepreneurs. If you are stuck in your business model or see no way out of your business problem, it will also be useful to read. It helps you to become a better and more modern entrepreneur. You will have more control over your success and see new options. You will make more profit if you invest in yourself. Improve your skills via education or training at least 4 hours per week. If you don't do that, your competitor will!

Entrepreneurship is 1) seeing/discovering business opportunities, 2) turning business opportunities into solutions and 3) creating value for customers (ie. solving a business problem for your client better than your competitor).

BRAND – NAME – LOGO – WEBSITE – PLAN – PLANNING – TEAM – CONTINUOUS IMPROVEMENT

In order to be able to do this you must know a lot about the market (that is the personas of your target audience) that you want to enter with your product, service or solution. You need to build a strong brand with a strong name, logo and website/webshop. You need to build a strong team, train your employees intensively. Constantly improve. You need to create a plan and execute a planning. Without a brand, plan, planning or team, hardly any rock will move. With a brand, plan, planning and a team that constantly improves, any rock can be moved. And please, do not be afraid to make mistakes as entrepreneur, but learn from mistakes as much as possible.

**“Be meaningful and more successful with your company by
building a brand instead of only a business” – Mark Paauwe**

Your business needs to change constantly because of a constant changing world, and you want your prospects and clients to follow you. People stay much better and longer with companies that have a strong brand. And if your strong brand provides solutions that resonate for its target audience you are heading for success.

Solutions

Today more and more companies provide solutions to clients or customers. A solution is a combination of products and services bundled/packages to address a business problem of clients or customers. For instance: Mobility solutions help clients with their mobility problems.

Providing taxi rides as a service together with an app where a client can order a taxi, can be seen as a mobility solution.

Today we have many new energy solutions (like wind turbines and solar panels) and agribusiness solutions (like aquaponics and insect farming) because of new production and IT technologies.

Solutions make it easier to collaborate with business partners and combine product and services from 2 or more companies.

Why not consider agritourism? <https://www.discover-suriname.com/downloads/agritourism.pdf>

Social Entrepreneurship instead of just Commercial Entrepreneurship

In society there are more and more problems that cannot simply be solved. For example, you cannot solve poverty alleviation with food parcels alone or by donating 1% of your turnover to charities. If you want to do more than that as an entrepreneur, then social entrepreneurship might be something for you.

More and more entrepreneurs feel that doing business is not just about making a profit. They want to contribute to solving societal and social problems. That doesn't mean you don't have to or can't make money. A social entrepreneur has a social product or service with a business model and as part of that a revenue model.

But how do you do that: Social entrepreneurship?

It is often a matter of envisioning and realizing an infrastructure or facilities that a large group can use at low cost.

More and more commercial entrepreneurs also engage in social entrepreneurship. They create a space in their company where they give a group of young people the opportunity to start their own company. This group will then design and build the infrastructure or facilities. Then, iteratively, with a lot of customer interaction, the products and services are continuously fine-tuned to the needs of the customers.

There are also entrepreneurs who start up an employment project in which they start up a business activity or workshop in another place (which can even be a different country) where the new employees need and receive more guidance and training. The entrepreneur still makes a profit, while the margins are smaller.

A question you can ask yourself as an entrepreneur is: if you can provide more and fair employment, with a lower profit margin, why wouldn't you do it? This is because social entrepreneurship is very satisfying!

Branding (via a Niche)

A brand is a name, term, design, symbol or any other feature that identifies one seller's good or service as distinct from those of other sellers. Starbucks for instance owns their color green. If you see that color, you already taste a caffe latte.

Important is to position yourself in the minds of your customers or clients. You could or better MUST do that by finding or creating a niche (within a niche): building a new category within a market(segment) OR try to become better or the best at something in a market(segment). Because the niche is in another way your USP! For instance: eco T-shirts with hand painted exotic birds or extinct butterflies.

The big brands in the world are often the result of hard work, good thinking, making decisions, focusing on what to do and what to leave. Also rewarding their clients smartly when they come to the shop or buy.

Below you see a couple of examples of big brands. Think of what they done: did they find a niche or are the best in their market or both?

Brand	Solution	Brand Message / Brand Promise	Value Proposition
Starbucks	Coffee Take away with snacks (Coffee Drinking shop / Take Away)	The third place to be with your friends and colleagues between home and work	Creating an intimate moment with friends or yourself to relax and enjoy
McDonalds	Dining and Birthday party solutions for people with young kids & lovers (Fast Food restaurant)	I'm Lovin' it	Food of a constant quality that is served quickly and consistently across the globe
Apple	Communication Solutions	Using apple products make you feel better	- To make your everyday life easier (with handy apps on your phone) - The experience IS the product (iPhone)
Coca-Cola	Refreshment solutions (Coca-Cola is the world's largest distributor and producer of soft drink concentrates and syrups.)	Refreshing the world	Coca-cola sells "happiness" and "joy" in a bottle.
Facebook	Social networking solution (a microblogging website)	Connect with your friends	A social utility that helps people communicate more efficiently with their friends, family and coworkers.
Nike	Footwear Solutions (Customizable Running Shoes)	Just do it	Offering accessibility, innovation, customization, and brand/status to customers
HelloFresh	Cooking Food Solution (A Meal Box Delivery Service)	A comfortable, time- and food saving, healthier alternative to supermarkets	Save time and thus money if you are busy and prevent waste of food. Make cooking together more fun.
Subway	Breakfast and lunch solutions	Eat Fresh	Subway deliver healthy and fresh sandwiches and provides customers

			with a large variety of healthy options
--	--	--	---

Why not consider a food truck serving veggie smoothies and fruit snacks outside gyms or at tourist sides?

Note that companies often have more than one value proposition and that the first value proposition will develop itself after at least 6 months of just selling product and services to customers or clients and constantly improving the product or service (f.i. Starbucks started with selling high-quality roasted beans). So creating a pitch deck without having tried to sell a product or service for 6 months may be much too early and not meaningful.

Lookup all the solutions, brand messages and value propositions of these big brands yourself on the internet. You will learn a lot with it.

Note that many of these big brands made marketing, sales and product development mistakes. But they learned from them quickly and improved their marketing, sales and product development with it right away. Be sure to look up their mistakes on the internet and also learn from them. You might discover a business opportunity for you doing that.

Example Business Model of HelloFresh

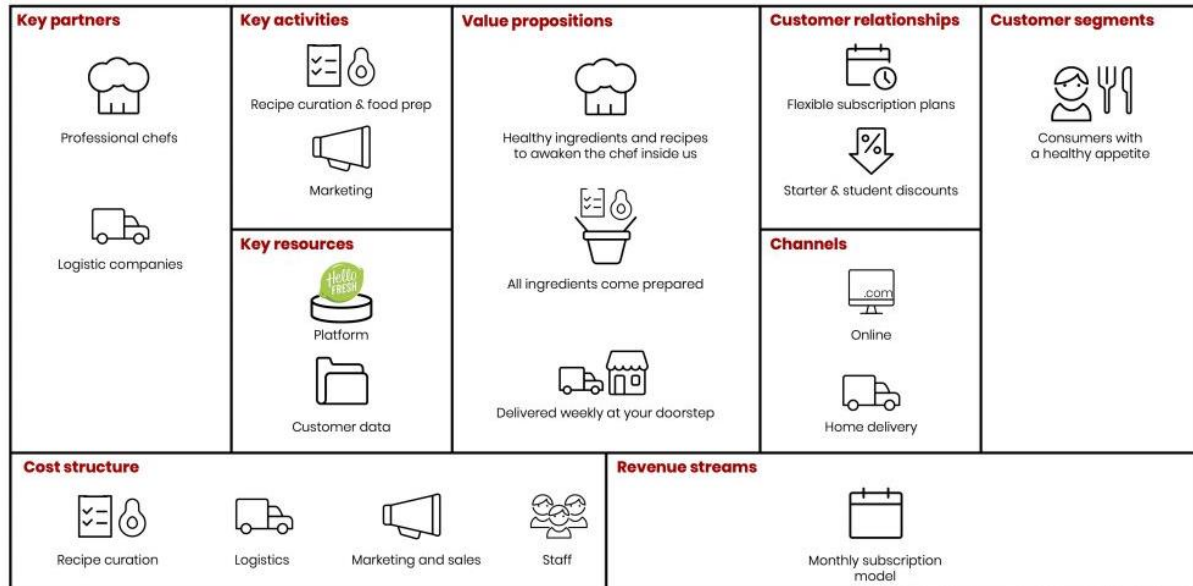

www.hellofresh.com

€1.80 billion (2019), Number of employees: 4,276 (2018), <https://en.wikipedia.org/wiki/HelloFresh>

Below is drawing of the business model of HelloFresh:

Here you can read what went wrong with the brand positioning of HelloFresh:

<https://www.entrepreneur.com/article/298102> and how they solved it.

Here are lessons in branding: <https://bughuntersam.com/lessons-in-branding-hellofresh/>

Also very interesting: <https://postfunnel.com/5-key-lessons-from-starbucks-recent-rebranding/>

And this one: <https://coschedule.com/blog/starbucks-marketing-strategy/>

Important lesson: Building a brand is never done. Work on it each day.

Questions

The questions below help to make you think hard about your own enterprise or business and to make decisions. The questions are focused on what do you really know and what have you done and what are you willing to do to really make money with your business or enterprise? If you do not understand a question, just check the internet for more explanation.

Answer the following questions truthfully (or better: do what they imply) and you increase the chance of making much more money and getting an investment as entrepreneur:

1. What kind of specific problems do you like to solve, and what kind of specific solutions do you like to provide for what kind of specific clients? And are you able to do that? A business is about solving problems and providing solution for customers and clients. It is not about solving your problems and providing solutions for you.
2. Why are others not better than you in solving these kinds of specific problems or providing these kinds of specific solutions?

3. Do you have enough factual knowledge and skills to solve the problems and provide the solutions (in a modern way)? Does your company have enough capabilities, technologies and solutions to do that? What have you done until now to improve that? How important do you think that is?
4. Do you know how to create a knowledge map, skills map or education map for yourself, your business and your employees to measure and improve weaknesses and opportunities on knowledge, skills, capabilities, technologies and solutions?
5. Do you know enough about blending and fusion of industries? An agriculture business can integrate ecotourism for more revenue. A tourist company can integrate eco fashion instead of plain merchandise for more revenue. A fashion company can integrate plant-based food catering, hospitality and eco education for more revenue. A catering business can integrate fashion, ecotourism and education, etc... What have you tried on this?
6. How many hours per week are you going to reserve to improve your entrepreneurship knowledge and skills? On which days are you going to schedule that? How many hours per week do you currently spend on education and training with certification or reading professional literature, improving your knowledge and skills?
7. How important do you think it is to be able to master the English language to be a successful entrepreneur?
8. Are you good enough in reading, writing and speaking English? How do you practice your English?
9. Do you, as entrepreneur, know the reasons why to write a business plan or project plan? Do you know what the structure is or building blocks are of a business plan or project plan? Do you know how to find a document template and detailed examples?
10. Do you know the difference between a plan and a planning? Did you make a planning last month how to make 15.000 EURO this month? Do you know what it takes to make 150.000 euro per month? What are your priorities to do it? What team do you need to execute the planning? What skills and knowledge do you and your team members have to gain to be able to execute the planning? And thus realize the revenue and profit for this month?
11. Do you know how important it is not to run the company on your own but with a team? Have you ever seen a soccer team where the trainer is running around on the field trying to be eleven players at once?
12. Do you know that you can deal with almost any bad attitude or behavior of team members or employees with good communicative skills from you, training of employees more in knowledge, skills, motivation and discipline? Do you have a plan and planning for improving skills, knowledge and attitude of team members and employees in your company? Why do you think big world-wide brands put attention to this?
13. Do you, as entrepreneur, have enough skills to use Word, Excel and PowerPoint or alternatives to write a business plan, investor pitch and create financial appendices with your business plan (like cost calculation, cash flow and profit loss)?
14. Do you have a business bank account to pay and receive USD and EURO? Do you have a credit card, for instance to buy a website domain via godaddy.com (or alternatives) or build your website via wix.com (or alternatives)? Do you manage your sales funnel via hubspot.com (or alternatives)? Do you manage your finances and accounting online (for instance with (f.i. exact.com) . Do you have smart phone with WIFI/internet?
15. If you do not have the skills to do or organize all of the above, what is your plan to acquire these skills, as entrepreneur?
16. How important is it according to you to constantly get feedback from prospects, clients or customers on your product, service and solution and use that to improve them?
17. How important is it according to you to have a website and what is your websites URL?
18. What is your main brand color? How does it help you build your brand?
19. What does your logo look like? What does it tell or say? How does it help you build your brand?
20. What have you done yourself to learn and understand how to get a domain name and a 1 page website?

21. How much do you know about starting up a company and doing business. Check f.i. www.kvk.nl It is not that hard as foreigner to startup a company in the Netherlands.
22. How do you do permanent education? What do you study, what books do you read and what training and certification do you do in new technologies so you can make your products and solutions smarter for your clients?
23. Do you have a business coach? (that is a good business friend that makes more than 1 million USD per month with his or her business. Do not stop looking if you do not have a business coach yet.
24. If someone gives you advice, how important is it that they can back up their advice with their own track record?
25. What is your main product or service?
26. What is your (type of) solution? (the combination of product and services that helps to improve an aspect of the business of your prospects/customers/clients? Is it a mobility solution? A sales solution? An energy solution? An HR solution? What is it?
27. What is your target audience?
28. What is a persona of your target audience?
29. How do you make sure your target audience knows about your product, service or solution?
30. What percentage of your target audience is educated in your product, service or solution?
31. What is your business model (write down in one sentence)?
32. What value do you create for your customers or clients? Ergo, what is the main reason that clients or customers will buy your solution and not the one of a competitor? what is your pitch? (write down in once sentence)?
33. Where does your knowledge about the business of your prospects, clients or customers come from?
34. How do you constantly improve and update that knowledge? Are you doing that?
35. What are the current or prognosed monthly costs of your business?
36. What is the current or prognosed monthly revenue of your business?
37. What is the current or prognosed monthly profit (revenue-cost)) of your business?
38. Who are your competitors?
39. What solutions (a combination of products and services) do they provide to your prospects/clients/customers?
40. What do your prospects/clients/customer spend monthly or annually on these solutions.
41. What have you done until know to make sure some prospect in your market known about your solution? How did you educate them?
42. What is needed in order to make 1 million USD per month with your solution?
43. With which business partners could you create a collaboration so you can make use of relations they have with their customers and clients?
44. How can you make money on import and export of your solutions, products and or services? Often entrepreneurs overlook the opportunities that import, export and re-export have.
45. How can you broaden your markets? Suppose your product, service or solution is fit for branch or sector, how to extend that to other businesses?
46. Are you busy daily with lead generation? Never stop doing that!
47. What have you done the past 6 months to build up a list of 100 interested people in your product or service? Did you write that down in a document?
48. Do you have a list of 100 prospects?
49. When did you engage them or when are you going to do that?
50. When did you show them a sample of your solution or gave them a demo of your product or service?
51. What was their feedback on your solution, product or service?
52. What did you learn the most from engaging clients or customers with a sample or demo of your solution and getting feedback from them?

© Copyright 2022, Dragon1

Increase process efficiency, IT capabilities, security & profit by generating visualizations of your organizations' architecture on Dragon1, the SaaS platform for Enterprise Architecture. Use views to visualize & manage complexity, risk, change, growth & innovation.

53. What did you do with that feedback? Have you improved your product with it?
54. What is your product roadmap? What improvements will you on your product, service or solution?
55. What are you 10 dream prospects/clients/customers?
56. If we asked them tomorrow, what will they know and say about you, your company and your solution?
57. Have you considered producing 100 sample items of your product and send them abroad to prospects to get their feedback?
58. What motivated you to start your business or to develop your product or service?
59. How can you scale your business?
60. Have you done a SWOT analyses?
61. How well do you know business finances: cost calculations? cash flow? Profit loss? If you create an investor pitch or business plan, you must know about these things.
62. Do you have an overview of your core business processes and for every core business process a process flow diagram? How important do you think it is to have documented your business processes?
63. Do you have a fixed moment on the day (an hour) for doing business development? Your personal business development hour?
64. Do you have a business development plan where you outline with activities HOW you are going to realize your plan?
65. Do you think you can do without an improvement plan and planning for your company?

The questions above all lead to be able to create a smart pitch deck with 10 slides.

Pitch Deck topics (and answers to questions)

Pitch Deck Slide	Question to answer on this slide
1. TITLE	What are your contact details?
2. OPPORTUNITY	What is the business opportunity that you see? Who has what business problem and how problematic is it?
3. VALUE PROPOSITION	How do you solve the business problem and why is it better than the competition?
4. SOLUTION, PRODUCT OR SERVICE	Which concepts, technologies, products and/or services are the magic behind your solution? Create a diagram
5. STRATEGY MAP	What is your identity (are you a snackbar or a restaurant providing food?), vision (view of the future) and mission (task fulfilment)
6. BUSINESS MODEL	How do you produce or provide your product, service or solution? What is your revenue stream? Create business model canvas diagram
7. GO-TO-MARKET PLAN	How are you going to everyone know you exist? How are you going to educate the market? How does your chain of delivery or logistics look like?
8. COMPETITIVE ANALYSIS	Who are your competitors and why do they have success and how and when are going to beat them?
9. MANAGEMENT TEAM AND PARTNERSHIPS	Who is part of your dream team? Name founders, board of directors, employees, board of advisors, investors and partners. And emphasize their knowledge, expertise and network
10. FINANCIAL PROJECTIONS AND KEY METRICS	What will your liquidity, cashflow, revenue be for the coming 12 to 36 months? How do you measure it is a success? What key metrics do you use?
11. CURRENT STATUS, ACCOMPLISHMENTS TO DATE,	What have you done and accomplished until now? Suppose you have a budget or get investment, how will you spend it?

TIMELINE AND SPENDING OF BUDGETS, USE OF FUNDS	
--	--

As entrepreneur it is always smart to create a PowerPoint Presentation as a Pitch Deck and a 1 minute video with your value proposition. It keeps you sharp, whether or not you want to get funding by an investor. Do this at least annually to make sure you keep innovating.

For questions or advice on becoming a better entrepreneur, suggestions for business opportunities or improving your business model, contact Dragon1 (see website).

Value Propositions

In order to be more successful as company it is essential to know your actual value proposition and live up to it (and document it).

A value proposition is a simple statement that summarizes why a customer would choose your product or service. It communicates the clearest benefit that customers receive by giving you their business. Every value proposition should speak to a customer's challenge and make the case for your company as the problem-solver.

A value proposition is a promise of value to be delivered, communicated, and acknowledged. It is also a belief from the customer about how value will be delivered, experienced and acquired. A value proposition can apply to an entire organization, or parts thereof, or customer accounts, or products or services.

A truly great value proposition introduces you to prospective buyers and helps you make a strong first impression. Your value proposition should describe: how your product or service solves/improves problems, what benefits customers can expect, and why customers should buy from you over your competitors.

More Example Value Propositions

In the beginning of this document you already saw example of value propositions, here follow more examples

AirBnB	Airbnb exists to create a world where anyone can belong anywhere, providing healthy travel that is local, authentic, diverse, inclusive and sustainable
Uber	The Smartest Way to Get Around
Apple iPhone	The Experience IS the Product
Levi's	The original authentic American jeans
Google	For Users: A free search engine for billions of users around the world For Businesses: Targeted text-based ads
Barbie	Inspiring girls to believe that "you can be anything"
ASML	We provide chipmakers with hardware, software and services to mass produce patterns on silicon, increasing the value of a chip while lowering the manufacturing cost.
PowerBI	Provide high-value self-service analytics to anyone who knows how to use Excel

Planning

Example Business Development Planning

As entrepreneur, you should have a business plan.

If you don't have a business plan, start making one today.

When you do have your business plan, you have to build your company as stated in that plan.

In other words, you are going to convert your business plan into a business development plan.

This planning is part of the business plan and shows how you, as entrepreneur, will implement the plan step by step, in order to realize the goals.

Make sure that all activities in this planning are reflected in your business plan in one way or another.

Make sure you think about HOW you are going to do something. Be as specific as possible when writing down the activities in the schedule.

Entrepreneurs that have a planning, do not waste time on things that do not bring them closer to their revenue goals and growth goals.

Entrepreneurs that have a planning often make more money and grow more rapidly with their business.

Tip: First do the activities that you find difficult to do. And try to make them easier by dividing them into sub-activities and researching them on the internet.

Example of attracting your target audience. Effective messaging on signs increases your revenue!

On the next page you see an example business development planning for every entrepreneur.

Next Level Entrepreneurship: Enterprise Architecture Concepts and Principles

In order to be able to stay on a steady course with your company, it is wise to identify enterprise architecture concepts and principles that guide you whatever decision you need to make.

Below is a list of 5 modern concepts with their principles (ie. working mechanisms) that will help you improve your business and company. Be sure to extend and improve this list using your experience and wisdom.

1. **CLIENT MESSAGING: EFFECTIVE MESSAGING ATTRACTS THE RIGHT CUSTOMERS AND CLIENTS** - Connect with your customers and clients by being open and honest on your values using branding and effective messaging. This will attract the people you want and fit your niche business.
2. **SOLUTION BUYING: BUYING MATURE SOLUTIONS PREVENTS WASTING TIME** - Buy a solution (ie. a machine, device, tool or software, being a combination of products and services) before building or developing your own solution, because then you have a more mature solution and not waste time on being a solution developer.
3. **STANDARDIZATION: STANDARDS AND QUALITY SYSTEMS HELP COMPLIANCE** - Select standards and implement quality systems for processes and IT solutions. You want to make sure that everything works well together and integrates so you can produce and deliver compliant to international rules and legislations. Checkout out international standards in your industry.
4. **PERMANENT EDUCATION: PERMANENT EDUCATION INCREASES COMPETITIVENESS** - Make sure that all your employees have a personal development plan. The more your employees are busy with permanent education the more competitive your company will stay.
5. **PLANNING: PLANNING SAVE TIMES AND MONEY** - Always write a plan, create a planning and build a team, when starting a new business activity or project. A planning helps you to focus, prioritize, collaborate, communicate and be successful.
6. **IT AND INTERNET** – IT and the Internet have long ceased to be an afterthought, but a main concern. Yet we still see that many entrepreneurs do not have a website or web shop at the core of their marketing and sales strategy. Yes, it's not easy. But then why not take the time every day to learn for yourself how you can make use of IT and the Internet in your company more efficiently and effectively. As an example: a modern supermarket nowadays is more an IT company with a web shop that distributes food, than something else.

On the internet you can find industry specific enterprise architecture concepts and principles. Try to compile a categorized list of at max 100 architecture principles (10 concepts and principles per business function) that you think you need to execute your strategy or run your business model.

Next Level Entrepreneurship: Enterprise Architecture Diagrams

For any organization or company, big or small, goes that certain key models, visualizations or views (theme maps) of your organization will help you as entrepreneur enormously to manage risk, change, growth and innovation. If you create the right enterprise architecture diagrams for your company, you can stay agile and competitive. If you do not create these architecture diagrams, chances are you slow down your company.

Create at least one diagram per business function (sales, marketing, HR, finance, etc...) and show per diagram at least for 10 architecture principles how well you implemented them. From experience the following enterprise architecture diagrams have shown to be key:

- Strategy Map
- Balanced Scorecard
- Business Model
- Business Functions Map
- Business Capability Model
- Business Processes Overview
- Business Process Flow Diagrams (BPMN)
- Factual Knowledge Map
- Skills Map
- Target Operating Model
- Technology Map
- Solutions Map
- Information System Models
- Application Models
- IT Infrastructure diagram
- Layered Enterprise Architecture Blueprint
- Process Application Map
- Security Architecture Management Overview

© Copyright 2022, Dragon1

Increase process efficiency, IT capabilities, security & profit by generating visualizations of your organizations' architecture on Dragon1, the SaaS platform for Enterprise Architecture. Use views to visualize & manage complexity, risk, change, growth & innovation.

- Education Map
- Use Case Models (UML)
- Cybersecurity / IT Security Map

On the internet you can find examples of these diagrams and industry reference models, to inspire you to create your own version of it.
